

JORGE IVAN VAZQUEZ HERNANDEZ

Sr. Product Designer Lead | UX/UI Designer | Frontend Developer Trainee

Pachuca, Hidalgo, Mexico | vazquez.dg22@gmail.com | linkedin.com/in/vazquezhd | vazquez-hd.vercel.app | github.com/VazquezHd

PROFESSIONAL SUMMARY

Sr. Product Designer Lead and UX/UI Designer with experience creating digital systems, SaaS platforms, B2B and B2C products, process and procedure tools, school management platforms, internal management systems, government platforms, and responsive web solutions. I specialize in transforming complex operational and business problems into clear, scalable, and user-centered products using UX/UI methodologies such as Design Thinking, Atomic Design, Design Systems, Information Architecture, User Research, User Personas, User Journey Mapping, Requirements Gathering, Mobile-First Design, component-based design, accessibility principles, and usability-focused prototyping.

My background combines product design, UX/UI, graphic design, and frontend trainee skills. I have designed systems for government processes, academic platforms serving 100,000+ users, SaaS, B2B and B2C digital products for international clients, web solutions for local businesses, state-level process platforms designed for the population of Hidalgo, and an EdTech school management system serving approximately 30,000 users. I also bring business-oriented skills from a graphic design and marketing background. English level: B1.

CORE SKILLS

UX/UI Methodologies: Design Thinking, Atomic Design, Design Systems, User-Centered Design, User Research, User Personas, User Journey Mapping, Requirements Gathering, Information Architecture, Interaction Design, Usability Testing, Heuristic Evaluation, Wireframing, Prototyping

Product & UX: Product Design, UX/UI Design, Product Strategy, User Flows, Accessibility, WCAG, Inclusive Design, Usability, Visual Design, Product Documentation

Product Contexts: SaaS Platforms, B2B Products, B2C Products, Internal Tools, Government Platforms, EdTech Platforms, Multi-Role Systems, Role-Based Access Flows

Systems & Platforms: State-Level Digital Services, Process and Procedure Systems, School Management Systems, Internal Management Systems, Workflow Optimization, Administrative Dashboards, Permission-Based User Experiences

Design Systems: Atomic Design, Design Systems, Component-Based Design, Mobile-First Design, Responsive Design, Interface Consistency, Figma, UX Documentation, Product Documentation

Frontend: HTML, CSS, JavaScript, ReactJS, Vue, Tailwind, Bootstrap, Material UI, LitElement, API Consumption, Git, GitHub, Bitbucket

Business & Collaboration: Business Requirements Analysis, Stakeholder Alignment, Marketing Fundamentals, Workflow Optimization, Operational Efficiency, Process Standardization, Agile, Scrum, Cross-Functional Teams

PROFESSIONAL EXPERIENCE

GRUPO NORTE 70 | May 2025 - Present

Sr. Product Designer Lead

- Lead UX/UI and product design for state-level government platforms focused on processes, procedures, digital services, and internal management workflows, designed for the population of Hidalgo, Mexico.
- Create scalable, multi-role platforms that support state-level processes, improve workflow visibility, standardize procedures, and help teams manage operational information for services with potential reach across 3M+ inhabitants.
- Design multi-role, permission-based platforms for administrators, operators, moderators, and end users.
- Translate complex institutional and business requirements into user research inputs, user personas, journey maps, user flows, information architecture, wireframes, prototypes, interface systems, and product documentation.
- Apply Design Thinking, Atomic Design, Design Systems, Mobile-First Design, component-based design, accessibility principles, and usability practices to create consistent, reusable, and scalable digital experiences.
- Collaborate with multidisciplinary teams and stakeholders to align government processes, user needs, technical feasibility, and product decisions.

SELECTED PROJECT EXPERIENCE

EDTECH STARTUP PROJECT | 2025 - Present

Product Designer / Frontend Developer Trainee

- Designing and developing a school management system serving approximately 30,000 users, focused on solving logistics, control, administrative, and operational challenges for educational institutions.
- Creating UX/UI flows, dashboards, information architecture, wireframes, prototypes, mobile-first responsive interfaces, and reusable UI patterns for school administration processes.
- Designing role-based experiences for administrators, operators, staff, and end users across school management workflows.
- Building frontend components and interfaces with HTML, CSS, JavaScript, ReactJS, and reusable UI patterns.
- Translating real school management problems into usable digital workflows for operational control, process visibility, administrative efficiency, and role-based access.

BUNTL | February 2024 - May 2025

Product Designer | Remote

- Designed SaaS, B2B, and B2C digital systems, product interfaces, and user-centered solutions for international clients in a remote collaboration environment.
- Created wireframes, prototypes, UI screens, product flows, user journeys, and interface documentation focused on usability, visual consistency, and business requirements.
- Collaborated with product and development teams to gather requirements, define features, organize information, and improve user experience across digital products.

UNIVERSIDAD AUTONOMA DEL ESTADO DE HIDALGO | June 2021 - February 2024

UX/UI Designer / Frontend Developer Jr. | Pachuca de Soto, Hidalgo, Mexico

- Designed and developed academic digital systems serving a university community of more than 100,000 users.
- Created platforms to organize student information, academic activities, and account-based processes using user flows, Figma, ReactJS, and Bootstrap.
- Improved usability, information access, accessibility, and workflow clarity for academic processes through UX/UI design and frontend implementation.

DIGY NETWORKS | June 2020 - April 2021

UX/UI Designer and Frontend Developer | Xalapa, Veracruz, Mexico

- Designed landing pages and UX/UI solutions for local telecommunications clients, focused on usability, visual hierarchy, and conversion.
- Built responsive frontend interfaces using ReactJS and Bootstrap.

HULUX TELECOMUNICACIONES | November 2019 - June 2020

Product Designer and Frontend Developer | Actopan, Hidalgo, Mexico

- Designed landing pages, web interfaces, and UX/UI solutions for local telecommunications services.
- Built websites using WordPress and Shopify to support service promotion, usability, and business communication.
